DETAILED ACTION

1. According to a preliminary amendment filed on Feb. 2, 2005, the applicants have amended claims 6-10 and furthermore, have added new claims 11 and 12.
2. Claims 1-12 are pending in the application.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 7 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 7 and 11 are directed to oxidic layer systems comprising instant compounds of claim 1. However, there is no written description about using instant compounds in oxidic layer systems in the specification.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, page 16, step c), line 1, the term ---- dye I' ---- should be ----dye I" ---- since dye I" is formed in step b) and furthermore, in line 3, the term --- m is equal to 0 ---- should be ---- m is not equal to 0 ----- since rylene core is brominated.

In claim 5, page 22, step a2), line 1, the term --- amin orylenanthramine --- should be --- aminorylenanthramine ---- and furthermore, step a) should be --- step a1) ----.

In claim 5, page 22, formula IIIa, bond is missing between N atom and C=O in the N-containing ring.

In claim 5, page 23, step b), line 1, step a) should be ---- step a2)----.

In claim 6, the term --- utilizing --- is vague. The applicants are suggested to use the term ----adding the rylene dye as claimed in claim 1 to said high molecular weight organic and inorganic materials ----.

Allowable Subject Matter

7. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-3, 8-10 and 12 are allowed since the instant rylene dyes of formula I, a process for preparing them and methods of using them are neither disclosed nor obvious over the prior art. In the prior art, Schuhmacher (DE 2212370, cited on applicant's form 1449) discloses Vat dyes of formula (Ia) which are closely related to instant compounds (see page 3). However, they differ in structure from the instant compounds in having different values of instant variables X and Y when n represents 1 in the instant compounds of formula I and furthermore, there is no teaching, suggestion or motivation in the prior art to modify the compounds of Schuhmacher to prepare the instant compounds.
